

Acid Shampoo A

Acid Car Wash Shampoo A

page 1 of 1

Concentrated acid shampoo for gantry car washes and tunnel car washes with conventional process-water treatment. The combination of mild acids and foaming surfactants guarantees gentle but thorough cleaning of vehicles, bonds to water-hardening elements, prevents limescale, and neutralises both the vehicle surface and the alkaline process water from the precleaning stage. Boosts self-cleaning and therefore the service life of brushes. Selected surfactants provide optimum preparation for drying. Encourages rapid sedimentation of dirt. Limited suitability for biological process-water treatment systems due to phosphate content.

Areas of use

Gantry car washes, tunnel car washes with conventional process-water treatment.

Recommendations for use

Apply via dosing pump either neat or diluted by up to 1:10. Recommended consumption per car: Foam: 15–30 ml. Shampoo: 8–15 ml.
